Research Experience

8/2013 - 06/2016

- Creighton University School of Medicine, NE, United States
Founder- CIMS, Dr. Vivekanandan, Dr. Wichman
CIMS, Creighton Internal Medicine and Student Research Group was started as an informal group by myself and Dr. Vivekanandan, with the aim of improving scholarly activity in the program. We saw exponential growth within a few months and presently have more than 50 medical students, Internal Medicine residents and core faculty mentoring the groups. Although teamwork was the backbone of CIMS, my personal contributions include creation of a protocol to avoid issues of duplication of work and authorship and hasten IRB approval. I facilitated fortnightly sessions, where members discuss ongoing projects and I helped identify and overcome roadblocks. The Creighton University acknowledged CIMS and had granted \$ 25000 fund for designing a website exclusively for research purposes including a custom software. Being selected as Chief resident for Research gave me a wider access to resources and furthered the reach of CIMS.

- "Path to Success" Career guidance program, India
Founder - Counselor
Following my national record of 300/300 score in medical entrance exam, I was invited to several schools as a guest lecturer and motivational speaker. The extremely positive response from the students was

humbling and I, along with a few other achievers founded a not-for-profit career organization – 'Path to Success' for career guidance counseling. We were invited as speakers in over 50 high schools annually. As demand grew, we expanded our repertoire to cover medical residency guidance counseling.
